SUMMARY

Full-stack engineer building production React/TypeScript systems with Postgres tenancy, Node APIs, and React Native. Recent work: multi-tenant nonprofit SaaS, construction pricing and tender commerce, a Lebanon marketplace with chat and dispatch, and a civic reporting platform (Master 1 thesis).

SELECTED WORK

NGOreality — ngoreality.com

Multi-tenant trust platform for nonprofits: public directory and badges on Supabase Postgres with RLS; schema-per-tenant Go CRM for case records; membership pricing (GST-exclusive), payment ledger, website monitors and notification jobs. React + TypeScript product surfaces (public, staff CRM, NGO portal). Isolation is a single acquire path, not a shared-table guess.

QSME — qsme.io

Construction SaaS: plans to bill of quantities, tender levelling, contracts, variations, and progress payments. Multi-role access (client / builder / trade). NZ GST and NZBN rules. Pricing and money-movement work in the same class as negotiated commerce.

Lebalist — lebalist.com

Lebanon marketplace: Expo / React Native app, Next.js public site and super-admin, Go API, Postgres. Listings, feed, chat, on-demand dispatch, local payments (OMT, Whish, cash) without a card-checkout requirement.

City Care — citycarelb.netlify.app

Master 1 thesis. Citizens report urban issues with photos and GPS; district admins see only their area. Node.js, Express, MongoDB, two React apps, JWT roles, GeoJSON, Arabic/English RTL. Admin demo: citycareadminlb.netlify.app.

EDUCATION

Lebanese University — Faculty of Sciences

Master 2, Information Systems and Data Intelligence (ISDI) — accepted.

Master 1, Computer Science — City Care thesis (live civic platform).

Bachelor of Science, Computer Science.

EARLIER

MERN stack — Techlarious / Two of Us, Jbeil

HTML, CSS, JavaScript, Git; React + Node apps; team e-commerce; API work with Postman and MongoDB.

SKILLS

React, TypeScript, Node.js, Express, PostgreSQL, MongoDB, React Native / Expo, Next.js, Supabase (Auth, RLS), Go APIs and workers, Tailwind, Git. Production deploys on Vercel, Railway, Netlify, Supabase.
